

BIRUK ZERADAWIT

biruk5063@gmail.com | +251 950 114 308 | github.com/birukzeradawit | Addis Ababa, Ethiopia

OBJECTIVE

Motivated Computer Science student with hands-on experience building full-stack web applications, including a catering platform with authentication and a relational database backend. Seeking a Computer Science internship to contribute to real-world projects while growing as a software engineer.

EDUCATION

American College of Technology
B.Sc. in Computer Science (In Progress)
Expected Graduation: May 2027

Addis Ababa, Ethiopia

SKILLS

Languages: Java, C++, JavaScript, SQL

Web & Frameworks: HTML, CSS, React, Node.js, Express.js

Databases: PostgreSQL, SQL, Relational Database Design

Concepts: Object-Oriented Programming (OOP), REST APIs, JWT Authentication, MVC Architecture

Tools: Git, GitHub

PROJECTS

Merkato Express — Catering Ordering Platform

github.com/birukzeradawit/merkato-express

- Built a full-stack catering ordering platform (React + Node.js/Express + PostgreSQL) with menu browsing, cart, checkout, and order tracking.
- Implemented JWT authentication, bcrypt password hashing, and role-based access control restricting order-status updates to admin accounts.
- Designed a normalized PostgreSQL schema (users, menu items, carts, orders) and wrote transactional checkout logic to keep cart and order data consistent.
- Added server-side input validation and centralized error handling/logging across the Express API.

Event-Hub — Event Booking Platform

github.com/birukzeradawit/Event-Hub

- Built a responsive event booking website in vanilla HTML, CSS, and JavaScript with a dark-themed, neon-accented UI.
- Implemented event browsing/filtering, a ticket checkout flow, user authentication, and real-time search, with data persisted via LocalStorage.

ADDITIONAL PROJECTS

Pulse Gym (multi-page gym website), Sheger Gebeta (food review site), and a To-Do List app — built with HTML, CSS, and JavaScript. Source code: github.com/birukzeradawit
